## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/551,531, filed on September 26, 2006.

### ***Information Disclosure Statement***

2. Acknowledgment is made of receipt of applicant's information disclosure statement (IDS) on September 30, 2005.

### ***Specification***

3. The disclosure is objected to because of the following informalities: in [0016] at line 4 delete "whole" and insert –hole—.

Appropriate correction is required.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 2 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 7,338,546. Although the conflicting claims are not identical, they are not patentably distinct from each other because each of the limitations of instant claims 1 and 2 are included in claim 1 of the reference of the patent. The function of “driving means” disclosed in the reference claim 1 is the same as the “driving device” in the instant application, and the “means defining a flow path. . . .” in the reference claim, 1 functions as the “the drainage chamber . . . outlet” in instant claim 1.

***Allowable Subject Matter***

5. The following is a statement of reasons for the indication of allowable subject matter: Regarding independent claim 1, the structurally unique limitations disclosed in instant claim 1 are distinguishable over the prior art reference of record. The limitations include a housing containing a separation chamber with a gas inlet and a clean gas outlet; a centrifugal rotor arranged to rotate about vertical axis in the separation chamber and to entrain gas to be cleaned; a drive shaft that extends downwardly from the centrifugal rotor through a bottom in the separation chamber and into a drive chamber situated below the bottom; a driving device for rotation of the drive shaft and the centrifugal rotor is arranged in the drive chamber; and a drainage chamber in which the drive shaft extends through the bottom with a liquid outlet drain situated to receive liquid that unintentionally flows upwardly from the drive chamber along the drive shaft. The prior art references of record fail to teach or fairly suggest these limitations. Accordingly, dependent claims 2-8 that are linked to claim 1 contain allowable subject matter.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and is listed on PTO-892 (Notice of References Cited). The references are considered to be of interest, as the references relate to the art of centrifugal separation.
